Environmental Policy

Environmental Policy

The national environmental quality objectives in Sweden aim for us to be able to pass on a society where the major environmental problems are solved to the next generation. Lava is inspired by the 16 national environmental quality objectives and the goal is to reduce the project's total environmental impact to the best of its ability.

Lavas environmental objectives

- 1 Minimize Lavas total energy consumption.
- 2 Maintain high environmental requirements for Lavas partners and suppliers, and also use environmentally conscious printing companies and transport companies.
- 3 The food served during the Lava events is vegetarian and, as far as possible, organic and locally produced.
- 4 Minimize the use of paper in all work around Lava.
- 5 Lava aims to travel responsibly throughout the project.
- 6 Lava chooses to use environmentally friendly products made from materials that can be recycled or are created from recycled materials.
- 7 Minimize environmentally hazardous substances, emissions of chemicals and choose eco-labelled alternatives as far as possible.
- 8 Lava recycles and sorts its waste.
- 9 After the events Lava will compensate for the climate through calculating the environmental impact and compensating accordingly.
- 10 All participants in the Lava project have knowledge of the fair's environmental policy and are involved in the work towards a sustainable fair.
